

Typing in Ge'ez

The Ge'ez keyboard (📄) provides *only* the letters used in the Ge'ez languages. It uses a system whereby the Ge'ez sounds are matched to English letters (a style called “phonetic”). You can think of how a word sounds in Ge'ez and then type it out with English.

Example: typing **selam** becomes ሰላም

Because Ge'ez has more sounds than English we sometimes have to adjust this rule. For example English does not have ‘ጠ’ and the closest similar letter would be ‘ጥ’. In this case you should type with “capital T”:

Example: typing **qTqaTie** becomes ቅጥቃጤ

Notice that we needed both “ie” together to make the 5th ‘ጠ’ letter ‘ጤ’. When the letter you want to type does not appear when you hit the similar sounding key in English, try using the capital next. If typing the capital does not work, then try hitting the key two times:

Example: typing **sselam** becomes ሠላም

Example: typing **SSeHey** becomes ፀሐይ

Next, when you need to type the extra letters of Ge'ez like ሷ, ሸ, ኃ you can do so by typing an extra vowel after a ‘u’:

Example: typing **mua** becomes ሸ

Example: typing **guie** becomes ኃ

Finally, we must introduce a special rule for ' (apostrophe). Some words are spelt with a ሷፍፍ (6th) letter followed by a vowel, like ሸፍፍ in ገብረፍፍል. We use the apostrophe here to type “gebr'iel” to make sure we get “ሸፍፍ” instead of ‘ፍ’.

Example: typing **mel'ak** becomes ሙልአክ

Example: typing **m'eraf** becomes ምዕራፍ

We also use the hash mark for English numbers, so #1 becomes 1 and so on. If a # is needed before a number in your document, just type # twice. This works for other punctuation as well, typing ‘;’ once produces ‘፤’ and a second time gives English ‘;’. The typing table shows how to type all Ge'ez letters, numbers and punctuation.
