

Keyboard Layout Yupik Cyrillic Unicode

August 2009

by Jim Brase

This keyboard will have the same layout as the 1999 legacy keyboard, but it will generate Unicode output.

The following keyboard assignments require single keystrokes.

The following keyboard assignments require single key presses:														
Ё ~/~	! 1/!	@ 2/@	# 3/#	\$ 4/\$	% 5/%	^ 6/^	& 7/&	* 8/*	(9/() 0/)	- -/_	+ =/+	Backspace	
Tab	Я Q	Ш W	Е E	Р R	Т T	Ы Y	У U	И I	О O	П P	Ю [/{	Щ]/}	 \ V	
Caps	А A	С S	Д D	Ф F	Г G	Ч H	Й J	К K	Л L	Ь :;/	Ж /'"	Enter		
Shift	З Z	Х X	Ц C	В V	Б B	Н N	М M	< , ./<	> . ./>	Э //?	Shift			

Notes:

1. <Caps Lock> should work on any punctuation key that has been remapped to an alphabetic character.
2. The original character assigned to a remapped key can be input by typing an “+” in front of it. Thus, press + ; to input a ;

The following keyboard assignments require multiple keystrokes.

The following keyboard assignments require multiple keystrokes:													
									“ ((or (= <hr/>	”) or)= <hr/>			Backspace
Tab	Я Q Q						Ў U U <hr/>	Й I I			Ю { { [[
Caps	Ā A A					Г G G		Қ K K					Enter
Shift		Ҳ X X	© (C)			Ъ B B	Ң N N	« <= <hr/>	» => <hr/>				Shift
								< <-	> >-				

There are a number of other character (fractions, trademark symbol, pound sterling, yen) which can be added to the Keyman table upon request.
