

Turkmen Latin and Cyrillic Keyboards

Created by David Gray

This package includes 2 Turkmen keyboards: **Latin-Turkmen-Unicode** and **Cyrillic-Turkmen-Unicode**. These keyboards are designed for simple typing of Turkmen Latin and Cyrillic text.

 **Turkmen-Latin-Unicode** is a Latin script Unicode keyboard for Turkmen. This keyboard includes an On Screen Keyboard and is based on the US English layout.

 **Turkmen-Cyrillic-Unicode** is a Cyrillic script Unicode keyboard for Turkmen. This keyboard also includes an On Screen Keyboard and includes the Cyrillic letters needed for Russian loan words.

Latin Keyboard Layout Notes

The ★ key (:) is a special key. Type it before most keys to get the QWERTY US value of that key. Type it before some keys to get special characters.

Type	To Get	Type	To Get	Type	To Get	Type	To Get
